

Year 6 Maths Worded Questions

1. Multiply 17.97 by one hundred.

2. A class has 32 children. Three-quarters of them bring a packed lunch. How many children bring a packed lunch?

A blank grid of 20 columns and 10 rows for drawing.

3. What is the sum of two-sixths and two and four-sixths?

[illegible]

4. Subtract 8.984 from 12.

5. A baker has one-fifth of a bag of flour. They share it equally between 4 bowls. What fraction of the original bag is in each bowl?

6. Find the difference between four-sevenths and four-ninths.

7. In a survey of 3600 people, 25% said they preferred summer. How many people preferred summer?

A full-page sheet of white graph paper with a light gray grid pattern. The grid consists of small, uniform squares covering the entire area. There are no margins, text, or other markings on the page.

8. A charity aims to raise £3000. So far, they have raised 3% of their target. How much money have they raised?

A blank sheet of graph paper with a light gray background and a uniform grid of thin gray lines forming small squares across the entire page.

9. A pencil costs £4.60. How much would 12 of these pencils cost?

[illegible]

10. What is four and a half minus three-fifths?

A blank sheet of graph paper with a grid of squares. The grid consists of 20 columns and 10 rows of small squares. There are no margins or additional markings on the page.

11. Subtract two and a quarter from seven.

A blank sheet of graph paper with a grid of squares. The grid consists of 20 columns and 10 rows of small squares. There are no margins or additional markings on the page.

12. 1050 sweets are shared equally between 35 children. How many sweets does each child get?

A blank sheet of graph paper with a grid of squares. The grid consists of 20 columns and 15 rows of small squares, forming a larger rectangular area. The lines are thin and gray, set against a white background. There are no margins or additional markings on the page.

13. Calculate the product of the sum of 14 and 8, and the number 7.

[illegible]

14. A recipe requires two and three-quarter cups of flour. A baker wants to make 120 times the recipe. How many cups of flour do they need?

A blank grid of graph paper consisting of 20 columns and 10 rows of squares. The grid is used for drawing or plotting.

15. What is 31.63 multiplied by one thousand?

A blank sheet of graph paper with a grid of squares. The grid consists of 20 columns and 15 rows of small squares, forming a larger rectangular area. The lines are thin and gray, set against a white background. There are no margins or additional markings on the page.

19. A piece of ribbon is one-fifth of a metre long. It is cut into 4 equal pieces. How long is each piece in metres?

A full page of blank graph paper with a uniform grid of small squares. The grid consists of 20 columns and 15 rows, providing a large area for drawing or writing.

20. A pizza had four-fifths left. Someone then ate one-quarter of the whole pizza. What fraction of the pizza remains?

[illegible]

21. Calculate 15% of 3800 grams.

A full-page sheet of white graph paper featuring a uniform grid of thin, light gray horizontal and vertical lines. The grid consists of 20 columns and 15 rows of squares, providing a structured space for drawing or writing.

22. Find 4% of £2000.

A blank sheet of graph paper with a grid of squares. The grid consists of 20 columns and 15 rows of small squares, forming a larger rectangular area. The lines are thin and gray, set against a white background. There are no margins or additional markings on the page.

23. What is the product of 5 and 0.3?

A full page of blank graph paper with a uniform grid of small squares. The grid consists of 20 columns and 15 rows, creating a total of 300 square units. The lines are thin and gray, set against a white background. There are no margins or additional markings on the page.

24. What is three and two-quarters minus two-thirds?

[illegible]

25. Subtract two and two-sevenths from seven.

[illegible]

26. How many times does 74 go into 1480?

A blank sheet of graph paper with a grid of squares. The grid consists of 20 columns and 10 rows of small squares. There are no margins or other markings on the page.

27. Calculate 35 plus 8 multiplied by 7 squared.

[illegible]

28. Three-quarters of the 320 students have a school dinner. How many students have a school dinner?

A blank sheet of graph paper with a grid of squares. The grid consists of 20 columns and 15 rows of small squares, forming a larger rectangular area. The lines are thin and gray, set against a white background. There are no margins or additional markings on the page.

29. Multiply 67.89 by one hundred.

A blank sheet of graph paper with a grid of squares. The grid consists of 20 columns and 10 rows of small squares, totaling 200 squares. The lines are thin and gray, forming a uniform pattern across the page.

30. What is four-tenths of 100?

31. Add two and four-sixths to two-sixths.

[illegible]

32.8 minus which number equals 3.687?

A blank sheet of graph paper with a grid of squares. The grid consists of 20 columns and 10 rows of small squares. There are no margins or additional markings on the page.

33. One-third divided by 3 equals what?

[illegible]
